Academic Role at King's:

Teaches Chemistry and Mathematics

Extracurricular Involvement:

Currently coaching Tennis and Badminton

Number of years at King's: 18 years

Interests and Hobbies: Sport, Music, Wine, Travel, Family and Fishing

I joined King's in 1991 as a Chemistry and Mathematics teacher under the Headmaster John Taylor and was appointed Housemaster of Major in 1994.

I strongly believe King's is a superb College with great traditions and standards, essential ingredients for the development of teenage boys. My philosophy is to be fair to all students and thus I expect the boys in the House to treat others the same way. All boys are expected to get involved in as much as they can, try new things, give service to others and be prepared to give anything a go.
