

Working with the iPad is helping me to improve the quality of my work.

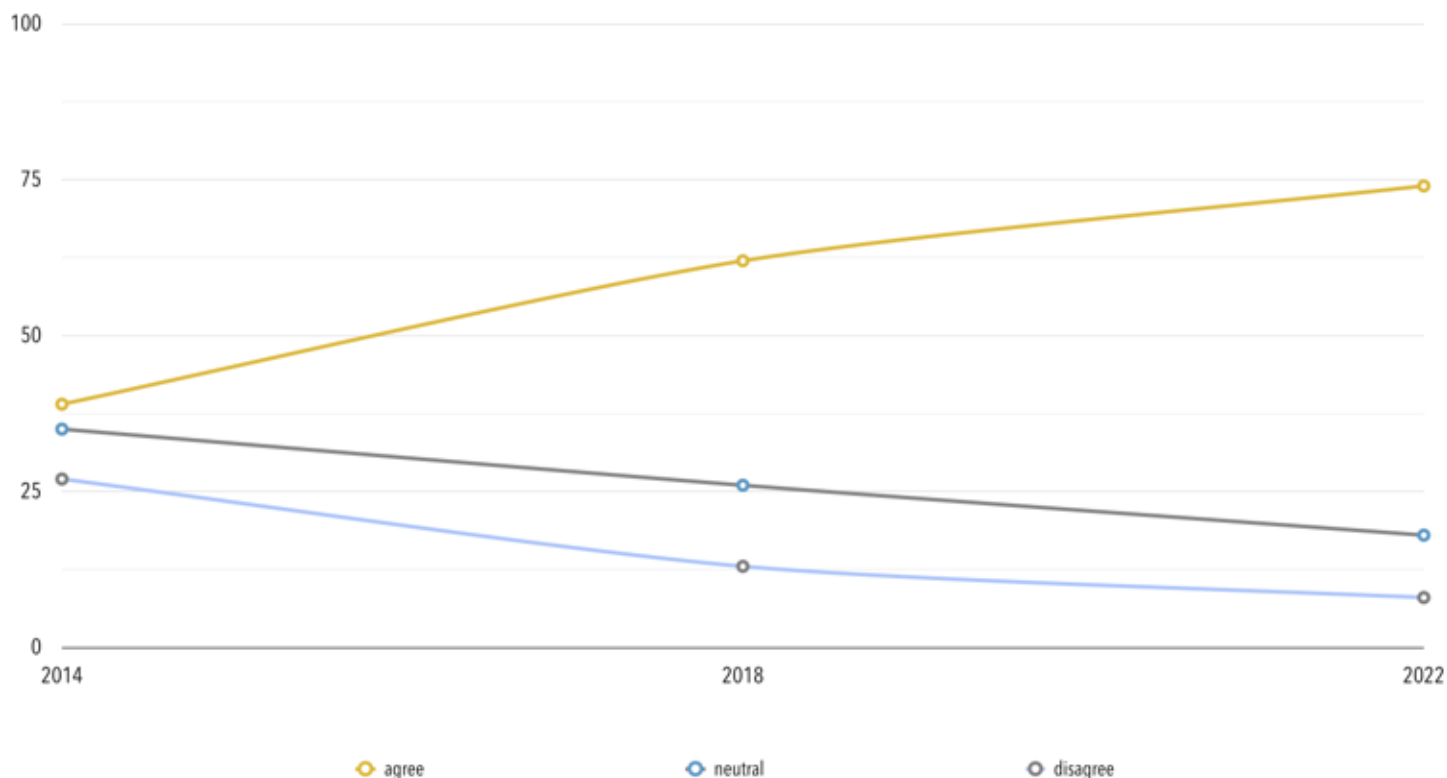

I feel that I am making better progress with the iPad than I did without it.

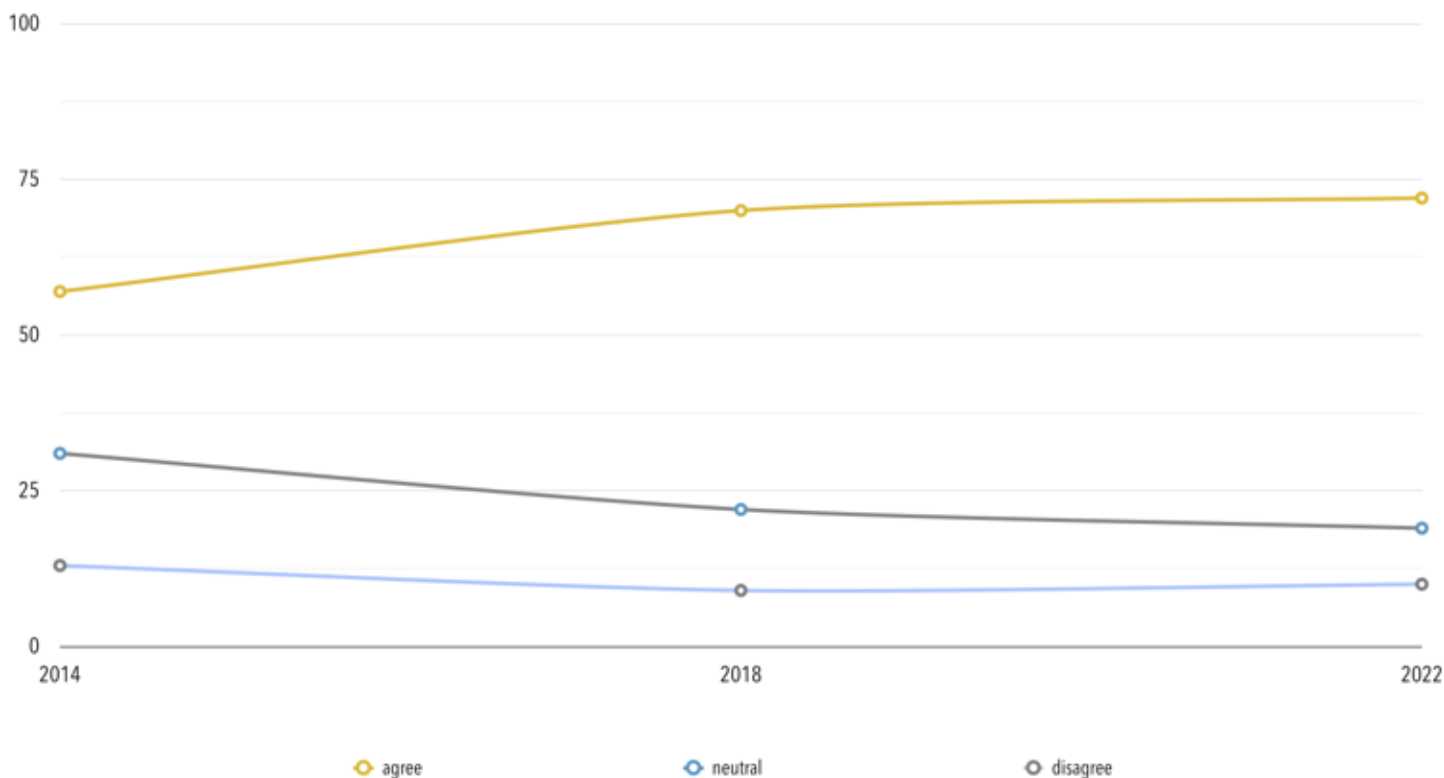

I think my achievement has improved since the iPad was introduced.

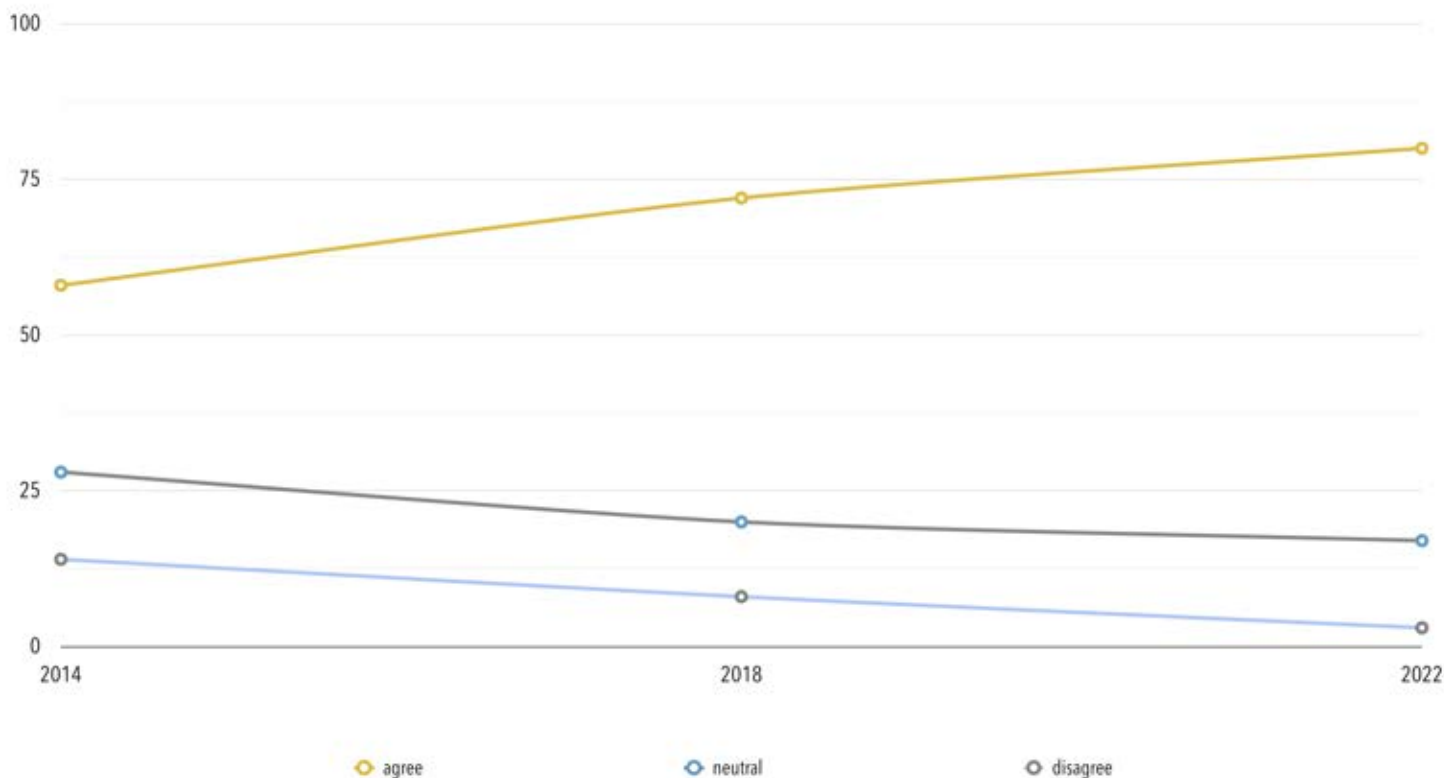

I feel that I am able to work more effectively with the iPad than without it.

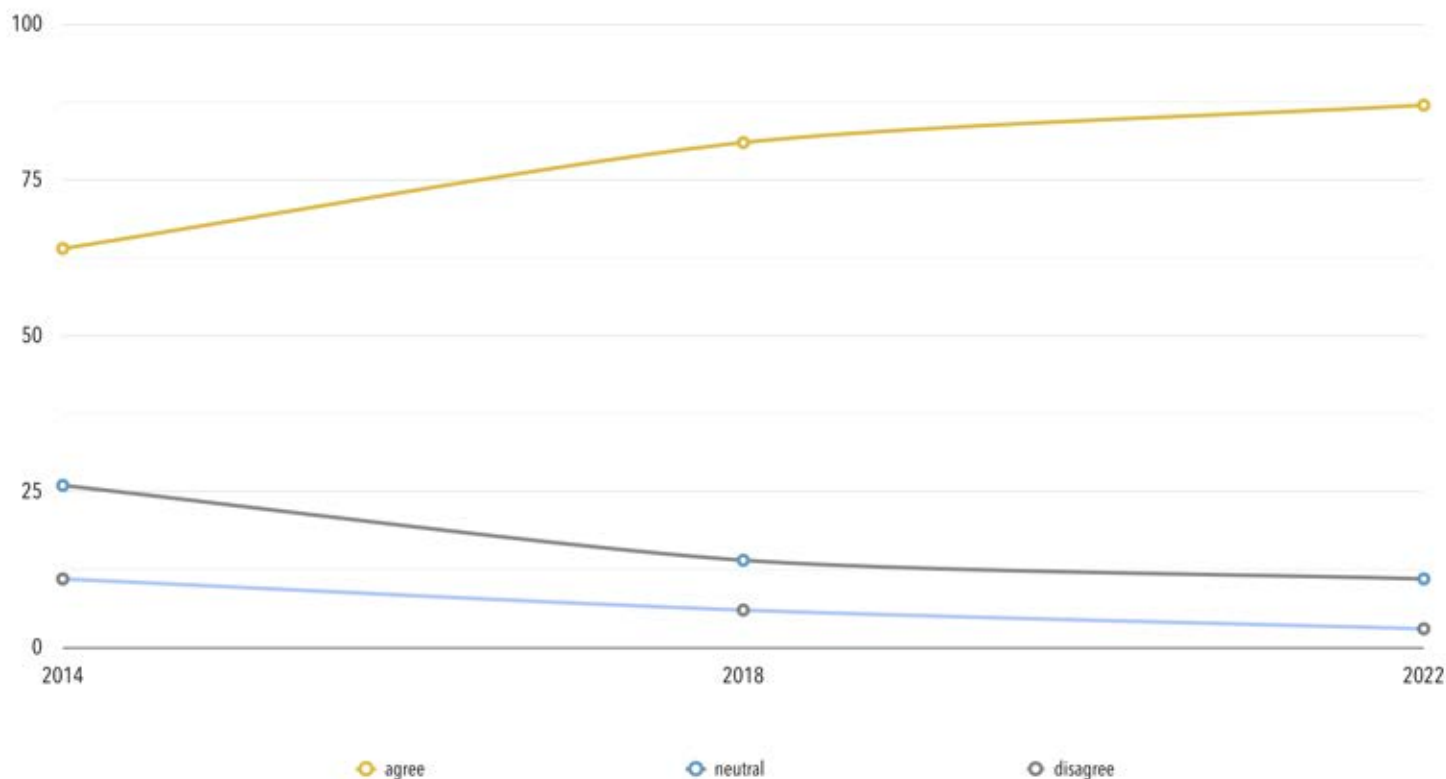

I am able to work more collaboratively with the iPad than without it.

I think that using apps has helped my learning.

I am happy to use the iPad regularly in my learning.

I have found the iPad easy to use in my work in class.
